WE ARE

RENOVATIO

ABOUT US

Founded in 2018 and based in Miami, Florida, Renovatio was born from a collective vision shaped by over 30 years of combined experience in the aesthetics industry. We've grown from a trusted partner in PDO threads into a comprehensive provider of advanced medical aesthetics tools.

Our roots are deep in clinical expertise and a passion for raising the standard of care. Everything we do—from product design to customer service—is driven by a commitment to deliver safe, science-backed solutions that practitioners can trust.

Renovatio means renewal, and we bring that spirit into every innovation we offer. With a focus on performance, precision, and partnership, we're proud to support aesthetic professionals across the country in achieving exceptional results.

MISSION

We aim to bring clarity and consistency to the often chaotic world of aesthetic medicine. From precision-engineered threads to trauma-minimizing cannulas and regenerative skincare, our goal is to set the benchmark for quality, safety, and real-world results.

Renovatio isn't just about products—it's about people. We're a human-centered company focused on delivering exceptional experiences from the start of the production chain to the final patient result. By combining scientific innovation with unmatched support, we empower practitioners to elevate outcomes, build trust, and transform lives.

THE MEANING OF RENOVATIO [LATIN]:

Renewal, restitution, rejuvenation, rebirth, reclaim.

TEAM CORE VALUES

- ~Reliability
- ~Trust
- ~Honesty
- ~Innovation

- ~Transparency
- ~Teamwork
- ~Playfulness
- ~Self-improvement

WHY RENOVATIO

Unwavering Quality

From PDO threads to microcannulas and post-procedure skincare, every product we offer meets the highest standards of precision, safety, and clinical performance.

Small-Batch Manufacturing

All our products are produced in small, carefully controlled batches—ensuring optimal freshness, inventory rotation, and consistent quality.

Climate-Controlled Logistics

Our shipping process is temperature-regulated from end to end, protecting sensitive materials like threads and topical creams during transit.

Feedback-Driven Evolution

We're constantly innovating based on practitioner feedback—adapting to your needs to keep your practice ahead of the curve.

Science-Backed Innovation

Whether it's our 360° cog rotation threads, our L-tip microcannulas, or our lactoferrin-based recovery cream, each formula and tool is grounded in research and built for results.

Advanced Engineering

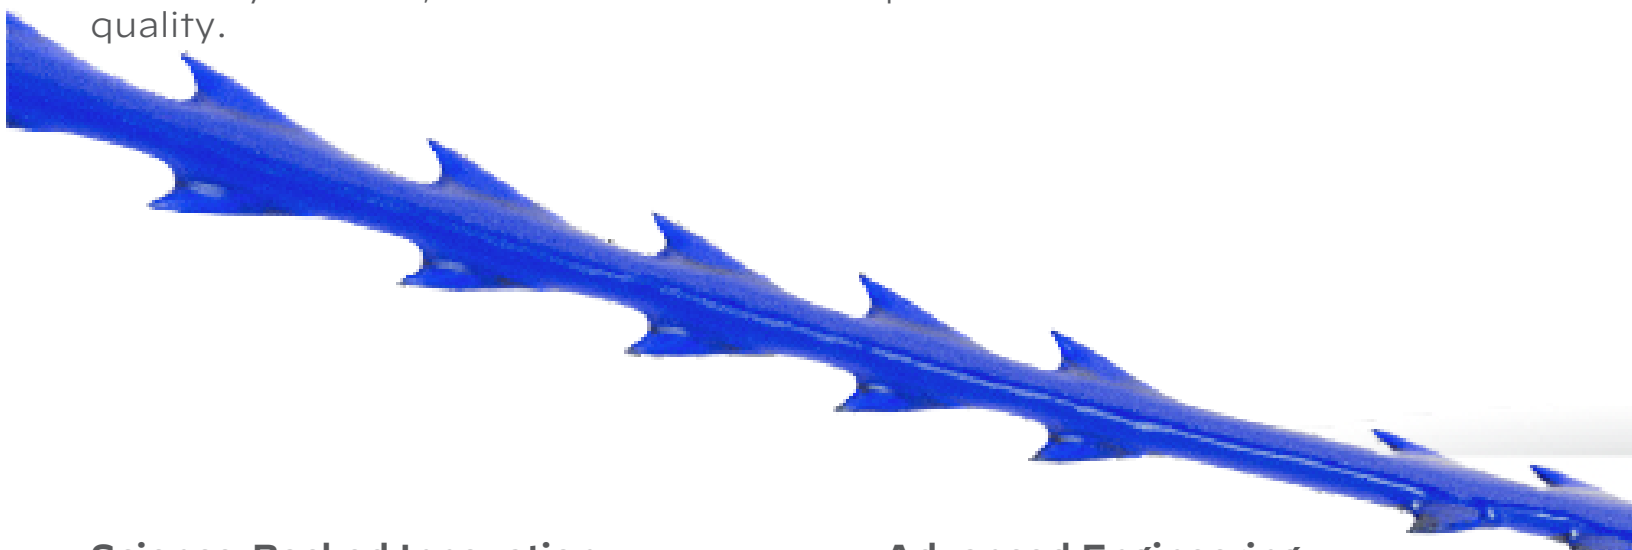

Our threads are crafted using patented ultrasound molding technology, while our cannulas are designed for smooth, precise delivery with minimal patient discomfort.

Practitioner-Centered Design

Everything we create is developed for real-world use—minimizing trauma, improving handling, reducing downtime, and delivering exceptional outcomes.

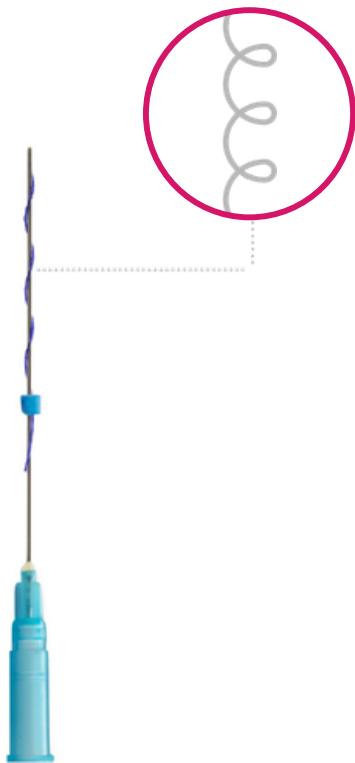

Premium Packaging

From single-blister sterilized threads to clinic-ready creams, our packaging is as intentional as our products—protecting performance and simplifying use.

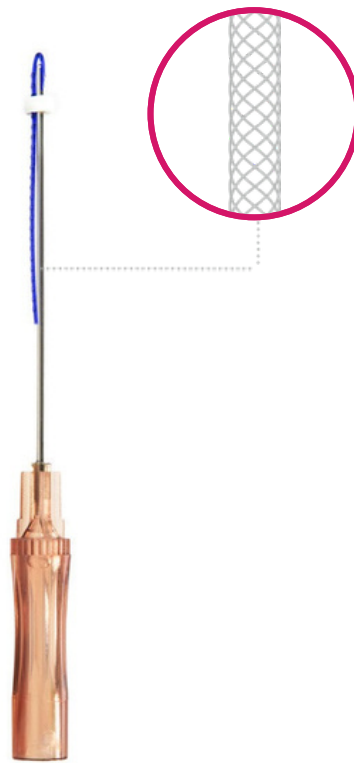

LET'S TALK ABOUT THREADS, BABY

TWISTR

VERSION 2.0

- Sharp cannula
- Monofilament smooth screw thread
- Our Twistr models are now version 2.0, featuring tighter coils compared to the initial version. This enhancement doubles de milligram of PDO per thread, leading to increased collagen production.

The Science of Bruise Clearance Powered by Liposomal Lactoferrin LT

WHAT IT IS

Before & After™ is a topical recovery cream formulated with liposomal lactoferrin, a naturally occurring iron-chelating protein.

Delivered through advanced nanolipid vesicles, it penetrates the skin to help reduce bruising, discoloration, swelling, and redness caused by aesthetic procedures, surgery, injections, injuries, or everyday trauma to the skin.

HOW IT WORKS

Lactoferrin binds and neutralizes iron ions—key culprits in bruise coloration, edema, and delayed healing. By clearing iron and supporting cellular recovery, it delivers:

- Faster clearance of bruises and discoloration
- Reduction in local inflammation and edema
- Protection of collagen from free radical degradation
- Support for skin renewal without irritation

HOW TO USE

Apply to clean, intact skin.

For best results, begin application 2–3 days before the procedure, 2–3 times daily, to prepare the tissue.

After the procedure, apply frequently to the affected area until discoloration resolves.

More frequent application will accelerate recovery.

For persistent discoloration or hemosiderin, continued use for several weeks may be required.

Do not apply on open or damaged skin.
